

ICD-10 Readiness Statement

MedBen will be fully compliant with the upcoming ICD-10 mandate by the deadline of October 1, 2014. We are diligently working to ensure that all of our system components are able to accept and process ICD-10 codes without interruption to our day-to-day processes.

Our current implementation timeline will allow us to begin internal system testing of the ICD-10 modifications early in 2014. This will enable us to begin testing with vendor partners several months prior to the October 2014 deadline.

(June 3, 2013)
