

MedBen Prescription Benefit Plan

2019 Drug Formulary

The MedBen Prescription Benefit Plan Formulary has been developed by a committee of physicians and pharmacists to ensure the provision of safe, efficacious, and cost-effective drug therapy. The committee meets on a quarterly basis to discuss new drugs and new prescribing information as it becomes available.

The list of outpatient prescription drugs provides frequently prescribed medications and which copayment tier will apply to the medication. The following formulary reference is designed so that it features medications in generic and brand name drugs. The brand name products are listed in a proper case ("Brand Name") and generic products are listed in lower case ("generic name"). If a covered brand name drug is not on this list it is assigned a Tier 3 copay.

Tiering

\$0-Affordable Care Act Drug

Tier 1=Generic Drug

Tier 2=Preferred Brand Drug

or * High Cost Generic Drug

Tier 3=Non-Preferred Drug

Benefit Notes

A=Age Edit

G=Gender Edit

QL=Quantity Limit

Benefit Notes are clinical edits such as quantity limits, age and gender restrictions that may apply to some medications. Since changes to the formulary may occur throughout the year, medications listed on this formulary are subject to change. Coverage for some drugs may be limited to specific dosage forms and/or strengths.

Certain drugs or drug classes (ex, specialty drugs or selected high cost drugs) may require prior authorization.

The listing of a medication on this formulary does not guarantee coverage. You may contact a Customer Care representative to obtain current formulary status of a particular medication. Please review your benefit plan documents for additional information regarding your pharmacy benefits and restrictions.

- Tier 2* abacavir sulfate sol
- Tier 3 Absorica
