

The MedBen Prescription Benefit Plan Drug Formulary has been developed by a committee of physicians and pharmacists to ensure the provision of safe, efficacious, and cost-effective drug therapy. The committee meets on a quarterly basis to discuss new drugs and new prescribing information as it becomes available.

This list of outpatient prescription drugs provides frequently prescribed medications and which copayment tier will apply to the medication. The following formulary reference is designed so that it features medications in generic and brand name drugs. The brand name products are listed in proper case ("Brand Name") and generic products are listed in lower case ("generic name") in each drug category. If a covered brand name drug is not on this list it is assigned a Tier 3 copay.

<b>TIERING</b>	<b>BENEFIT NOTES</b>
\$0 - Affordable Care Act Drug	A = Age Edit
Tier 1 = Generic Drug	G = Gender Edit
Tier 2 = Preferred Brand Drug or *High-cost Generic Drug	QL = Quantity Limit
Tier 3 = Non-Preferred Drug	

Benefit Notes are clinical edits such as quantity limits, age and gender restrictions that may apply to some medications. Since changes to the formulary may occur throughout the year, medications listed on this formulary are subject to change. Coverage for some drugs may be limited to specific dosage forms and/or strengths.

The listing of a medication on this formulary does not guarantee coverage. You may contact a Customer Care representative to obtain current formulary status of a particular medication. Please review your benefit plan documents for additional information regarding your pharmacy benefits and restrictions.
